PROJECT

Fintech Analytics Dashboard

Designed and developed a modern, responsive Fintech Analytics Dashboard for Indian users, presenting financial insights through a clean, intuitive interface. Created interactive income and expense analytics, spending trends, savings overview, transaction summaries, financial goals, category-wise spending charts, and account balance cards using realistic Indian financial scenarios and ₹ (INR) currency. Implemented responsive layouts, reusable UI components, smooth animations, interactive charts, filters, and visual indicators to simplify complex financial information. The project demonstrates creative UI/UX, data visualization, responsive frontend development, and the ability to create engaging, visually polished financial interfaces.

Headphone Product Landing Page

Designed and developed a modern, responsive headphone product landing page focused on creating an engaging and visually appealing user experience. Implemented smooth animations, transitions, interactive UI elements, and visually polished layouts to showcase the product in an attractive way. Focused on responsive design, clean component structure, consistent spacing, typography, and smooth navigation across different screen sizes. The project demonstrates strong understanding of modern frontend development, UI presentation, animation, and user-centric design principles.

SKILLS

React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, React Router, Context API, Node.js

Express.js, MongoDB, REST API Integration, Git, GitHub, VS Code, Postman, npm, Responsive Web Design, Component-Based Architecture, State Management, Axios, JSON, Basic Python, Data Structures & Algorithms (DSA).

CERTIFICATION

NPTEL : Joy of Computing using python

Skyskills : Java Programming
